MILEAGE MAKER CONTEST

Let's keep track of how many yards of yarn/fiber we use in our COMPLETED projects and see how far we can 'virtually' travel.

The Moon is our second target!!! 225,623 yarn yards

This chart is an example of the information we need to propel our progress!! (Remember to included all projects, big and small, kept and gifted)

Completed Project Description	Quantity of Yards Used	For Charity?
Joinpleted Froject Description	Quality of fards Osed	For Charity

Determining yardage:

- 1. Weight of knitted item (ounces or grams)
- 2. Determine Grist by:

Total Yardage of Ball/Skein divided by
Total #of Ounces/Grams of Ball/Skein

- 3. Then multiply weight of knitted item by the grist
- 4. Now you have total yardage of item

Submit your chart details to <u>jefferypink@gmail.com</u> by the end of each month.

Remember to submit the pictures of your completed items to: Patti Reyes (patti.reyes@dc.rr.com)
